WORKSHOP as part of the Interreg T4Rail project

‘Technological Opportunities in Railway Operations at the Italy- Slovenia Border: Challenges and Potential Impacts’

A discussion on the main challenges of current Italy-Slovenia cross-border railway services and the expected benefits from the implementation of technological interventions, involving railway companies, logistics businesses, and local authorities, in order to assess possible outcomes in terms of improving transport connections, creating new job opportunities, reducing environmental impacts, and strengthening territorial cohesion

21st February 2025, at 16:00
